Department of Computer Science and Engineering  
Michigan State University

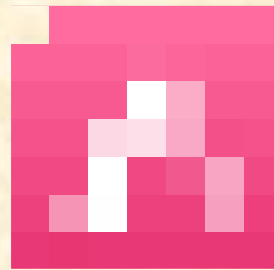

Fall 2023

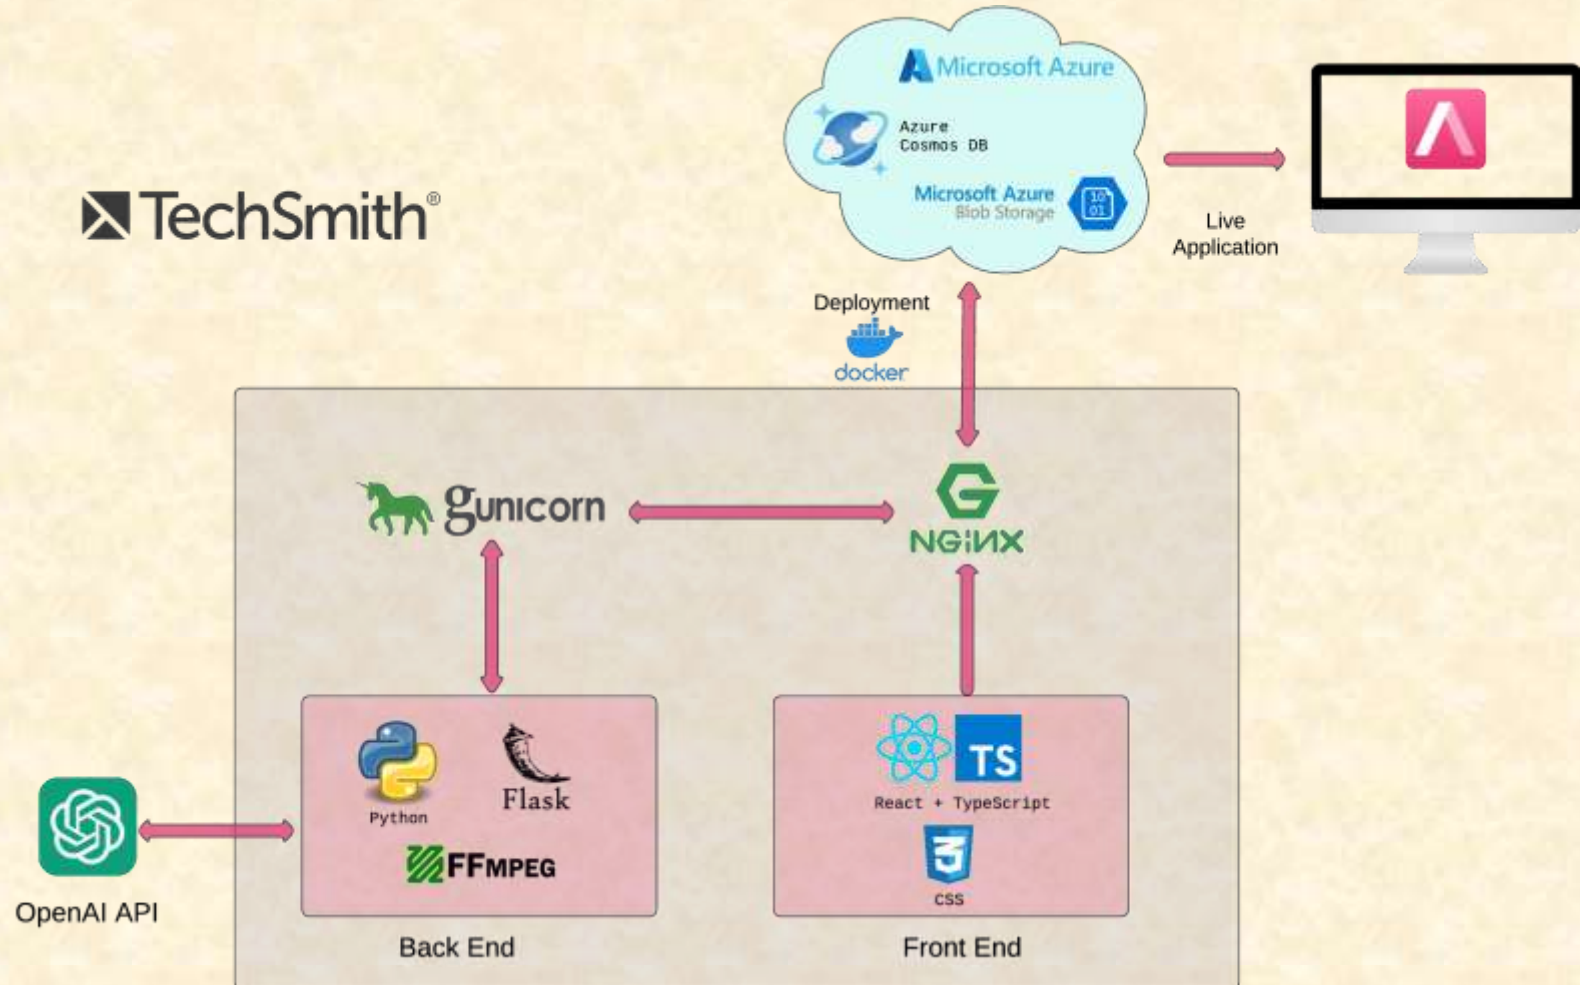

*From Students...  
...to Professionals*

# Project Overview

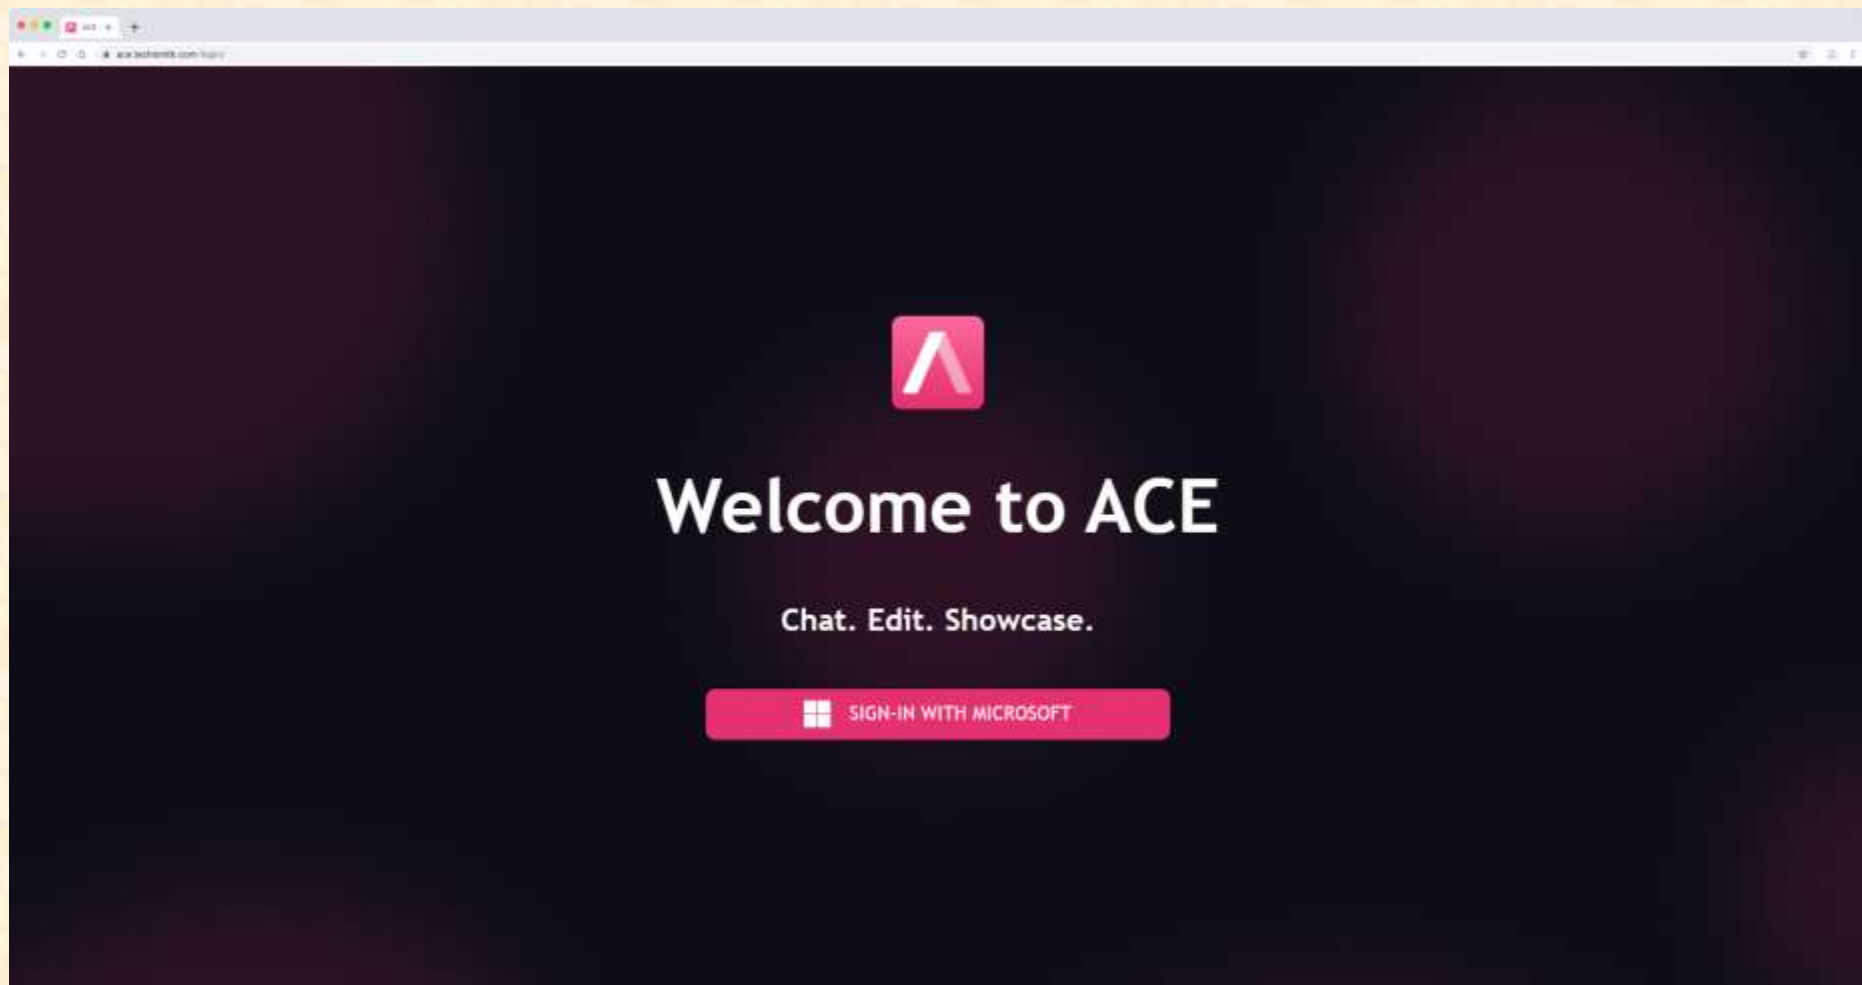

- Video editing through AI
- Users converse with chatbot to make edits
  - Only need to describe desired outcome
  - Project re-rendered after each edit
- Final video can be downloaded or edited again

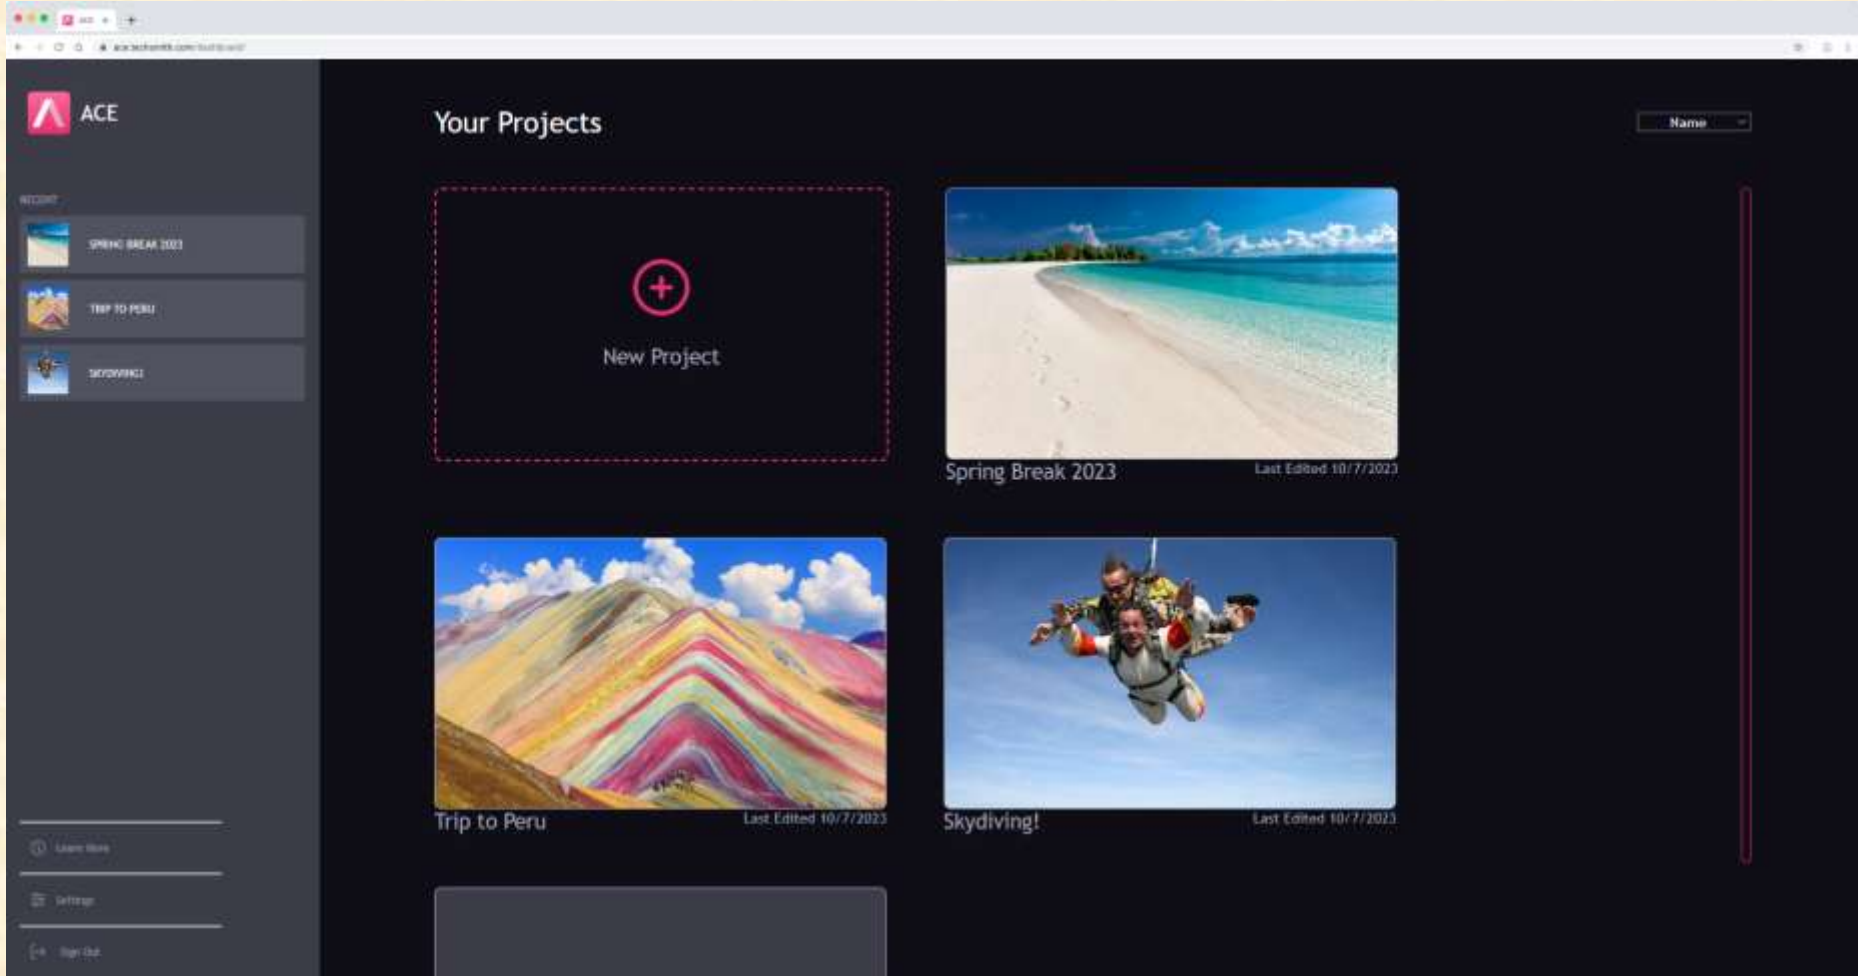

# System Architecture

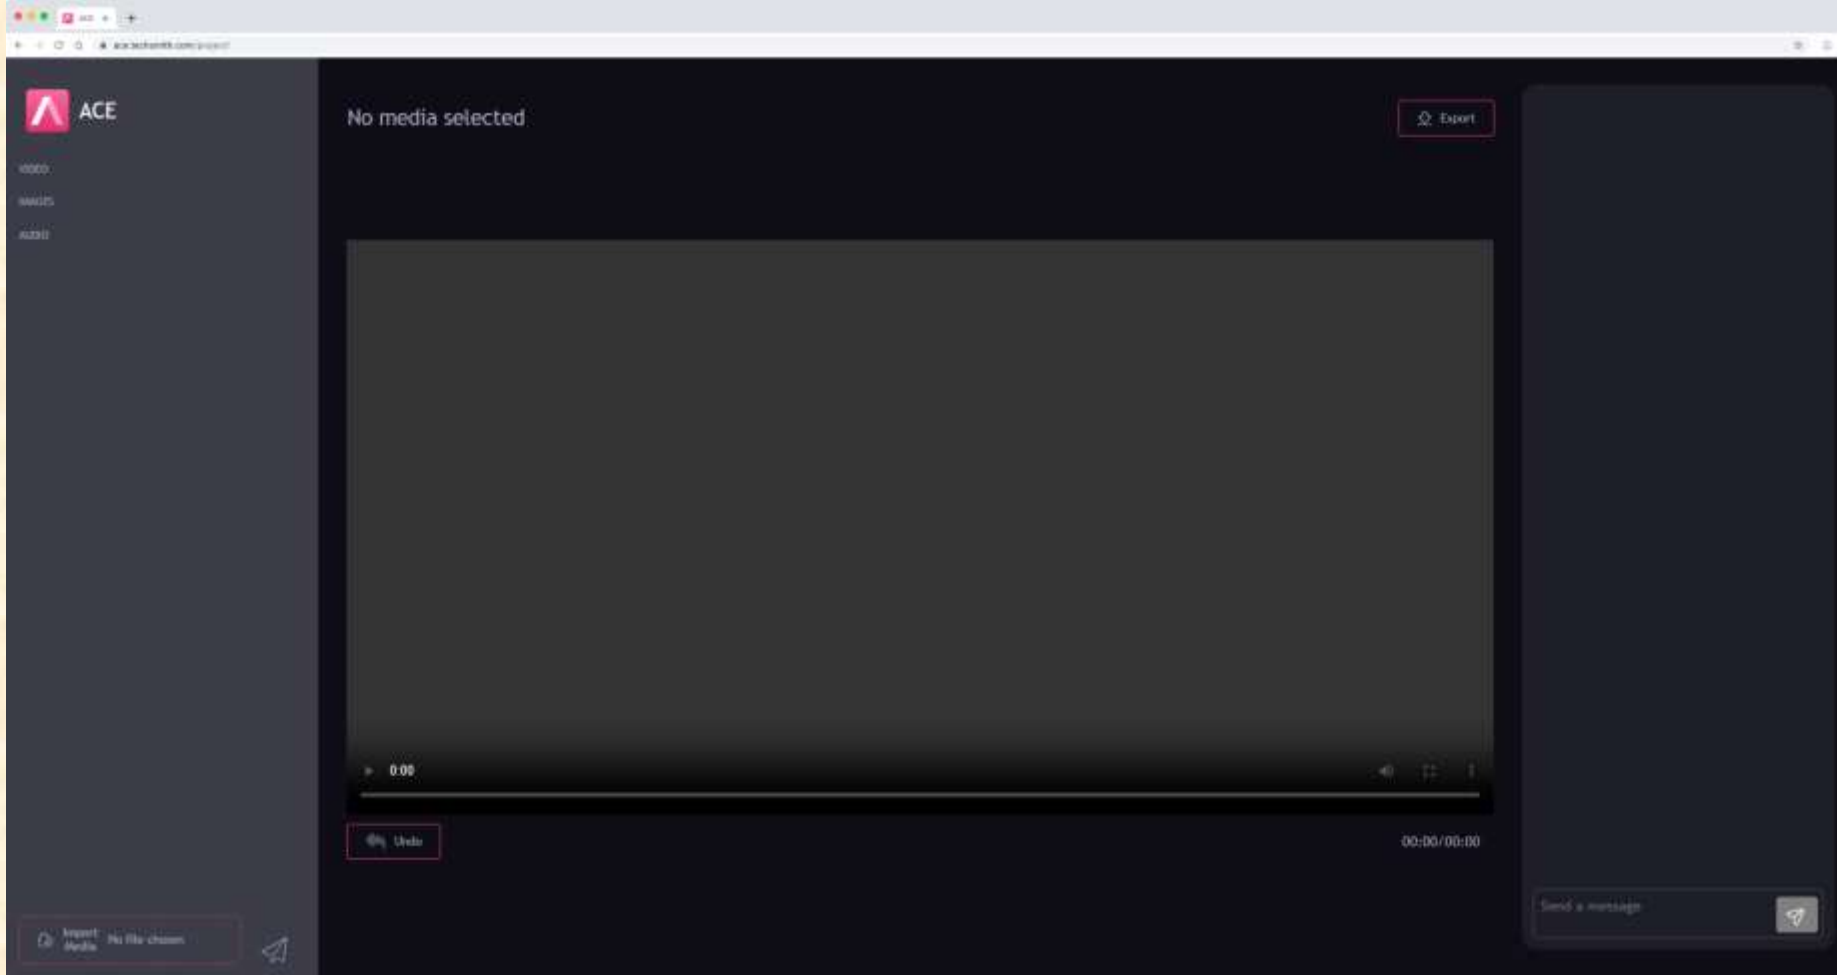

# Login with Microsoft Authentication

# User Dashboard

# New Project

# Project Page

The screenshot displays the ACE video editor interface. The main workspace shows a video titled "CELEBRATION.MP4" with a play button and a "Links" button at the bottom. The video content depicts a person celebrating with confetti. On the left, there are sections for "VIDEOS", "IMAGES", and "AUDIO" with various asset thumbnails. On the right, a chat window is open, showing a conversation with the ACE AI assistant. The chat messages are as follows:

Welcome to ACE, what do you want to create today?

can you add the videos celebration and sample-5s together?

Sure, I can help you with that. Here are the edits: 1. Concatenate "celebration" and "sample-5s" videos together, and save the output as "celebration\_sample-5s".

I think you need to use the arguments `concat`.

Apologies for the confusion. Here are the edits: 1. Concatenate "celebration" and "sample-5s" videos together and save the output as "celebration\_sample-5s". Here is the command: `concat celebration sample-5s celebration_sample-5s`. Let me know if you need any further assistance or if there are any other edits you'd like to make.

# Project Page – Ideal Chat Interaction

The screenshot displays the ACE video editor interface. On the left, there is a sidebar with the ACE logo and sections for VIDEO, IMAGES, and AUDIO. The main area shows a video player with the title 'CELEBRATION.MP4' and an 'Export' button. The video player is currently at 0:03 / 0:17. Below the video player are 'Undo' and playback controls. On the right, a chat window shows a conversation:

Welcome to ACE! what do you want to create today?

Hello ACE! I have a video I want to share with my friends, but I'd want to add some text to it. Can you help me with that?

Of course! I can help you add text to your video. Please provide the following information: 1. The name of your video file. 2. The text you want to add. 3. You may also specify the position and color of the text. Once I have all the details, I will get that done for you!

Can you write the text "Happy Birthday" in an elegant font over the video celebration.mp4?

Sure! I will add the text "Happy Birthday" in an elegant font to the video celebration.mp4. I will now proceed with the edits and create the video for you.

I think my friend's favorite color is actually white, can you make sure that the text is white? Oh, and could you center the text in the middle of the video?

Certainly! I will now proceed with the edits to create the video with the updated text position and color.

# What's left to do?

---

- Expand editing capabilities
- Fully integrate with the Azure backend
  - Rendering the video in the cloud
  - Manage project logic with sessions
- Deleting and renaming media and projects
