Spring 2024

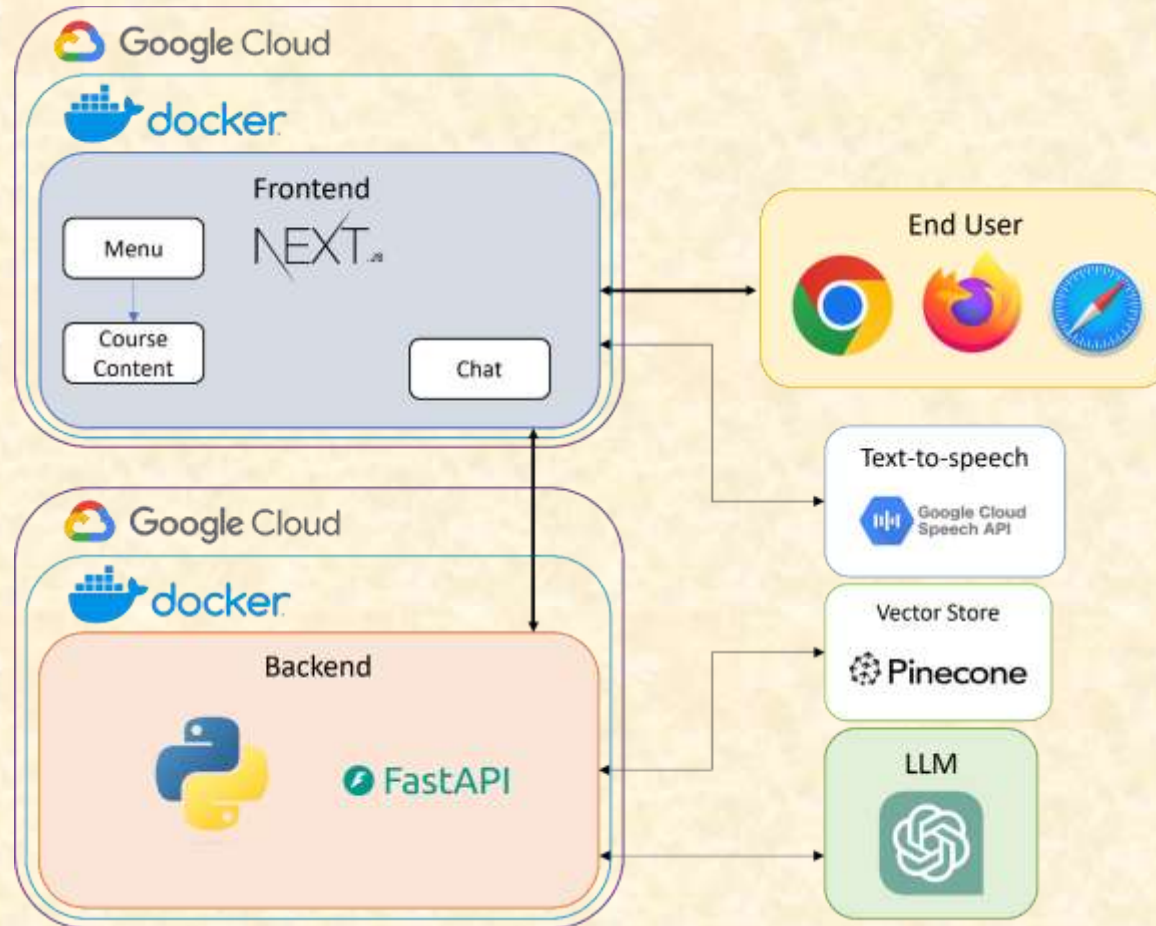

*From Students...
...to Professionals*

Project Overview

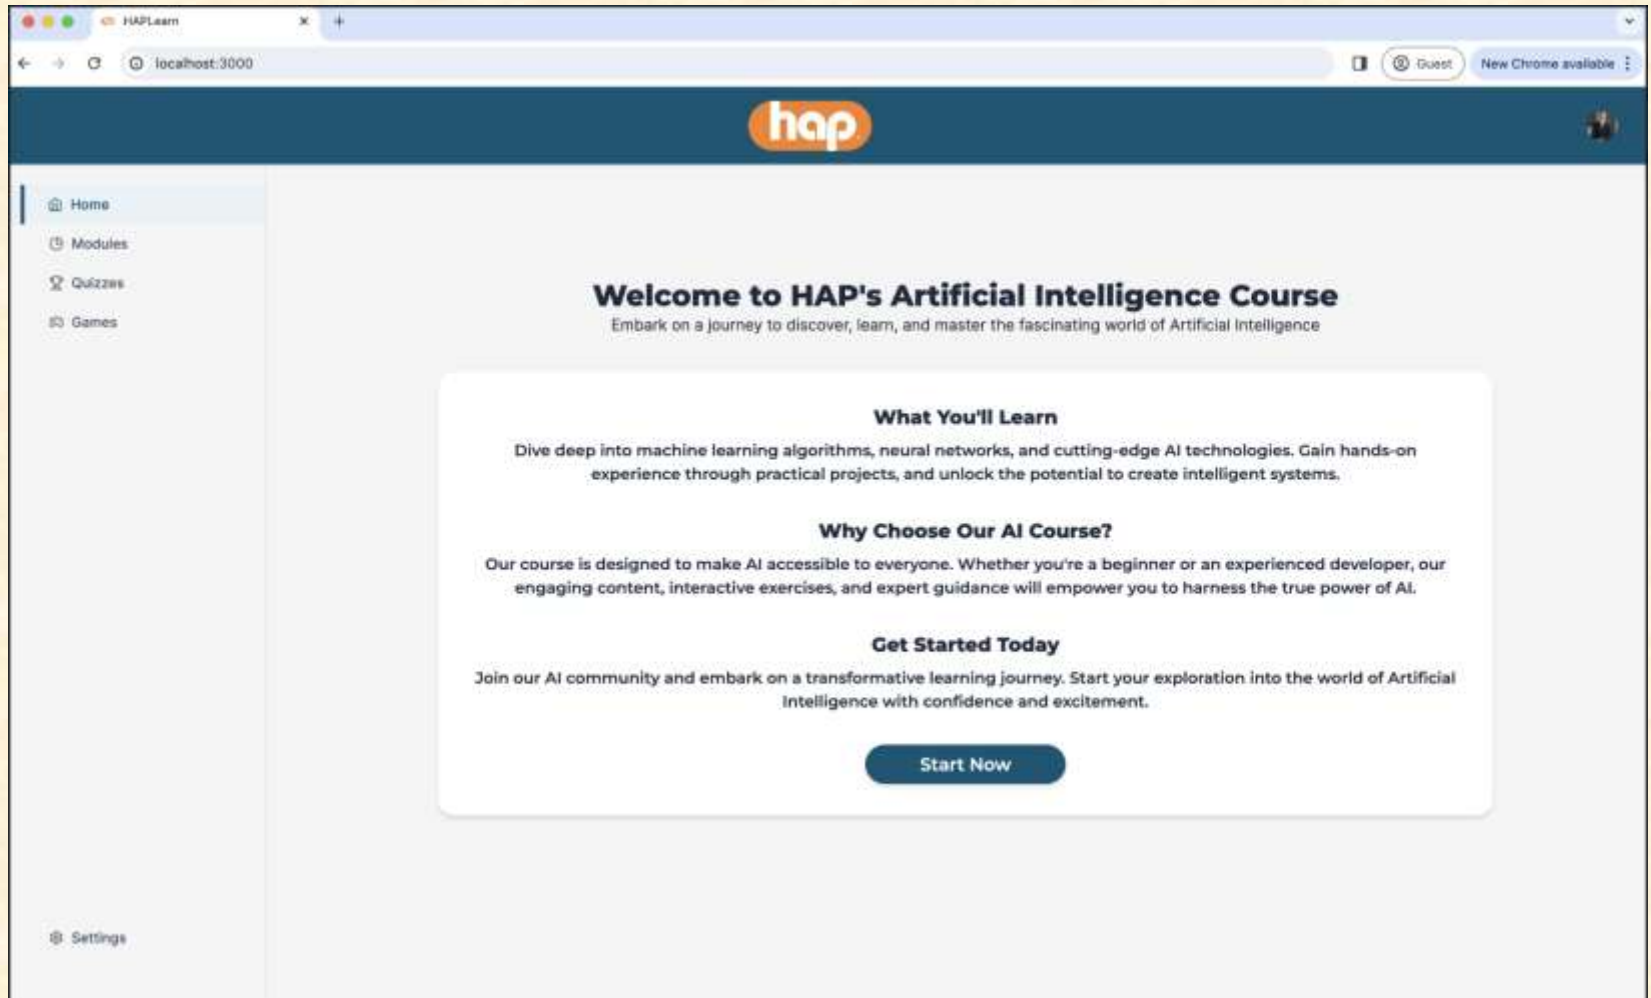

- Required training course for HAP employees
- Simplify AI learning with a 30 minute web-based course covering AI basics, tailored for all technical levels
- Integrate an interactive AI character for engaging content delivery and adaptive Q & A

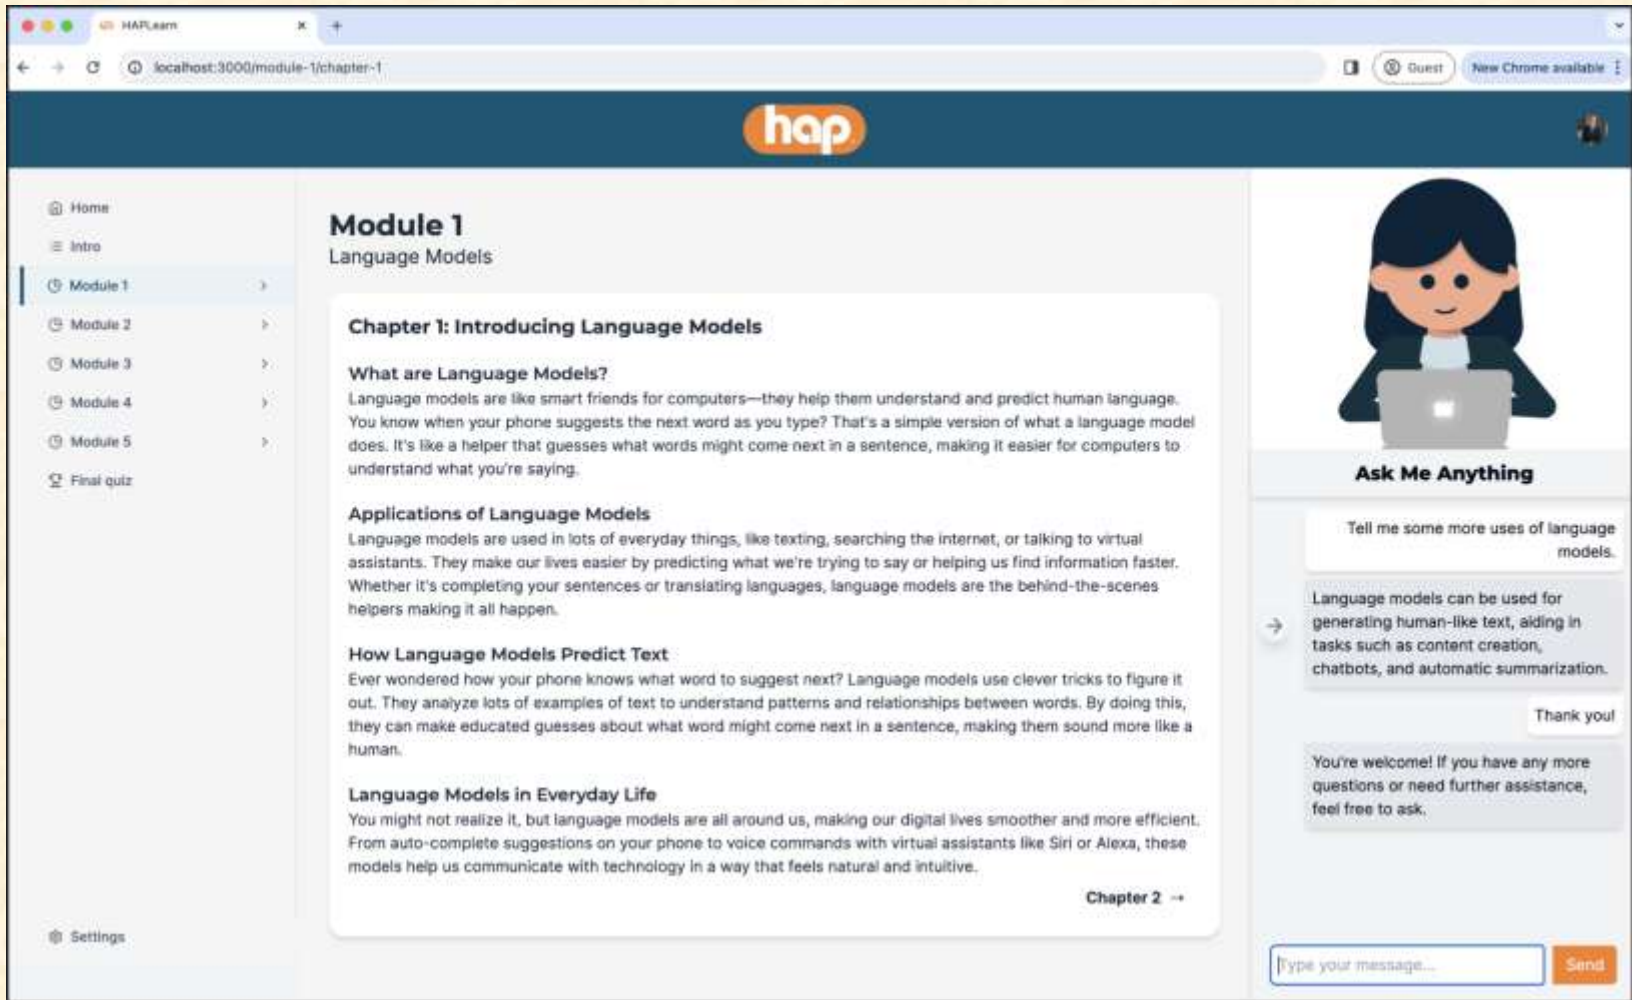

System Architecture

Landing Page

Module One

The screenshot shows a web browser window with the URL `localhost:3000/module-1/chapter-1`. The page features a dark blue header with the 'hap' logo. A left sidebar contains a navigation menu with items: Home, Intro, Module 1 (selected), Module 2, Module 3, Module 4, Module 5, and Final quiz. The main content area is titled 'Module 1 Language Models' and contains 'Chapter 1: Introducing Language Models'. This chapter includes sections on 'What are Language Models?', 'Applications of Language Models', 'How Language Models Predict Text', and 'Language Models in Everyday Life'. A 'Chapter 2' link is visible at the bottom right of the content area. On the right side of the page, there is a chat interface with a cartoon avatar of a woman at a laptop. The chat is titled 'Ask Me Anything' and shows a conversation where a user asks for more uses of language models, and the assistant responds with examples like content creation and chatbots. A 'Send' button is located at the bottom of the chat input field.

Quiz Three

The screenshot shows a web browser window with the URL `localhost:3000/module-3/quiz`. The page features a dark blue header with the 'hap' logo. A left sidebar contains a navigation menu with items: Home, Intro, Module 1, Module 2, Module 3 (selected), Chapter 1, Chapter 2, Chapter 3, Mini Quiz (selected), Module 4, Module 5, and Final quiz. The main content area is titled 'Module 3: Exploring Advanced AI Models' and contains a 'Mini Quiz' section. The quiz consists of five questions (Q1-Q5) with multiple-choice options. The selected answers are: Q1: GPT by OpenAI; Q2: PaLM by Google; Q3: Struggling with very technical topics; Q4: Claude by Anthropic; Q5: Writing poems and stories. On the right side, there is an 'Ask Me Anything' chat interface with a cartoon avatar of a woman at a laptop. The chat history shows a user asking for help with question three, followed by an AI response explaining Claude's strengths and weaknesses, and a user reply saying 'Awesome! Thank you!' and 'You're welcome! Happy to help!'. At the bottom of the chat is a text input field and a 'Send' button.

Module 3
Exploring Advanced AI Models

Mini Quiz
Test your knowledge on advanced AI models with this quick quiz!

Q1: Which Large Language Model is known for its ability to write essays, poems, and engage in conversations?

- PaLM by Google
- Claude by Anthropic
- BERT by Google
- GPT by OpenAI

Q2: Which model is particularly noted for its reasoning abilities and math skills?

- PaLM by Google
- Claude by Anthropic
- BERT by Google
- Llama by Meta

Q3: Claude by Anthropic is designed to follow specific writing styles and instructions. What is one of its weaknesses?

- Generating creative content
- Understanding and writing in multiple languages
- Struggling with very technical topics
- Performing mathematical operations

Q4: Which model is celebrated for its multilingual capabilities and creativity in text generation?

- PaLM by Google
- Claude by Anthropic
- BERT by Google
- Llama by Meta

Q5: BERT by Google is great at understanding language context and nuances. What type of tasks is it especially useful for?

- Writing poems and stories

Ask Me Anything

I am struggling with question three. Can you please help me?

Certainly! Claude by Anthropic is designed to follow specific writing styles and instructions, but one of its weaknesses is struggling with very technical topics. This means it may have difficulty generating content that requires deep technical knowledge or understanding.

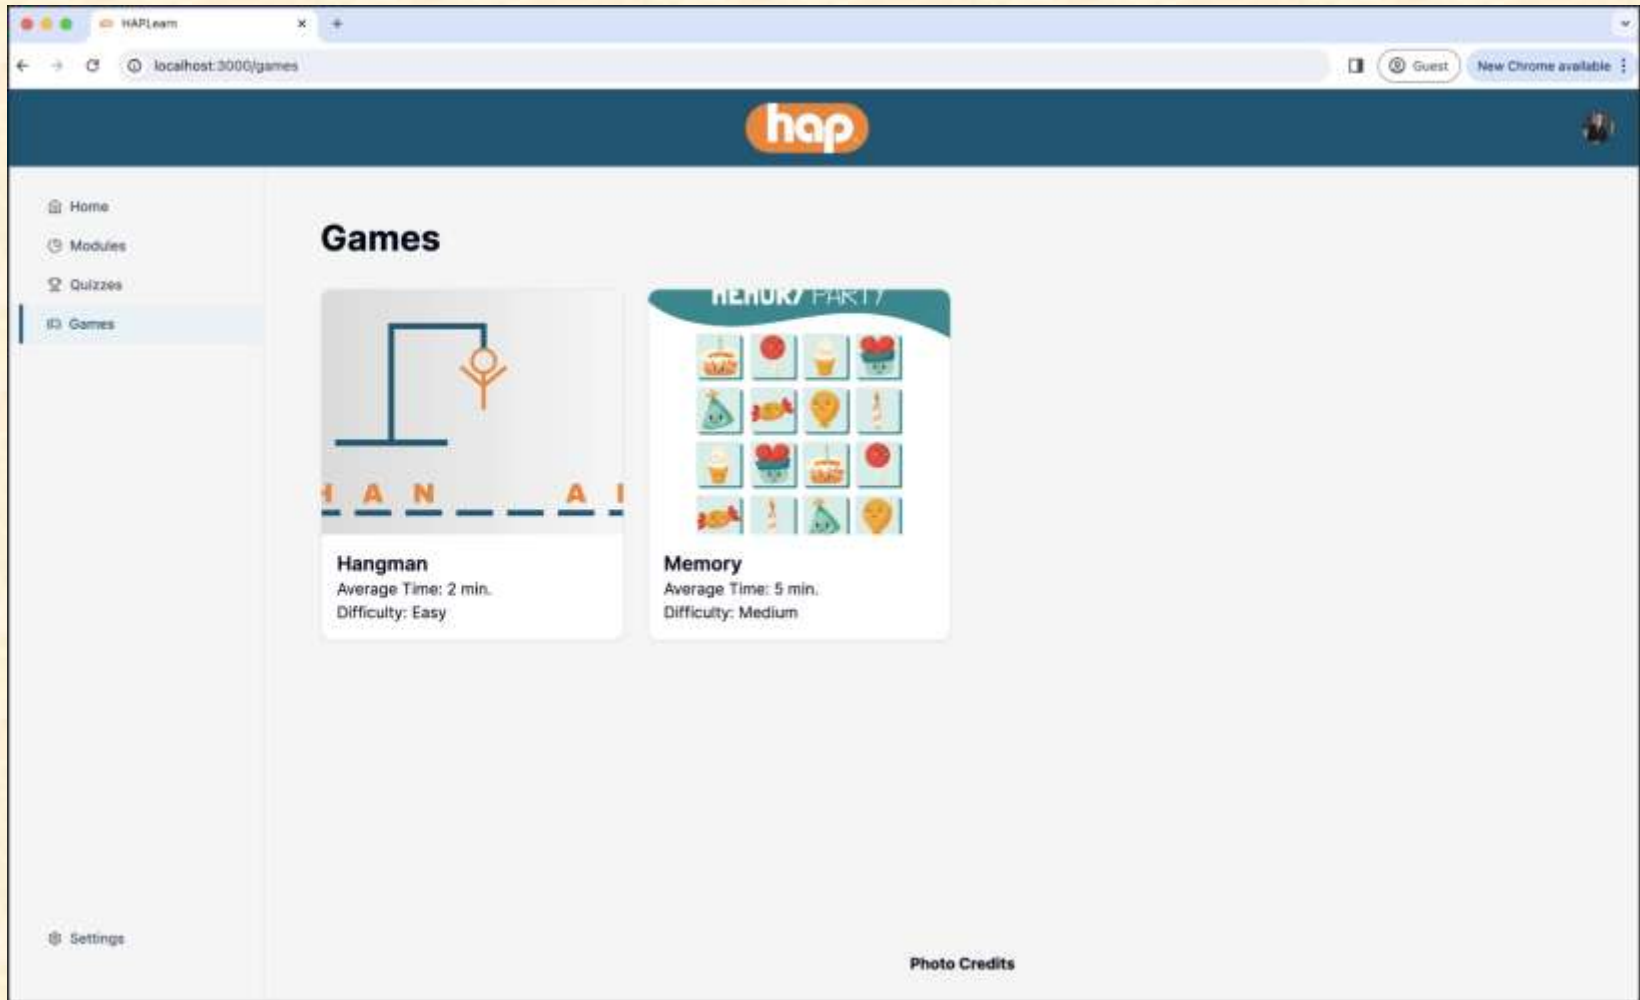

Awesome! Thank you!

You're welcome! Happy to help!

Games Page

What's left to do?

- Add final quiz
- Lock Modules
- Finish resource & quiz page from landing screen
- Create extension(s) of project
 - Add more games
 - Certification of class
 - AI playground
