Project Overview

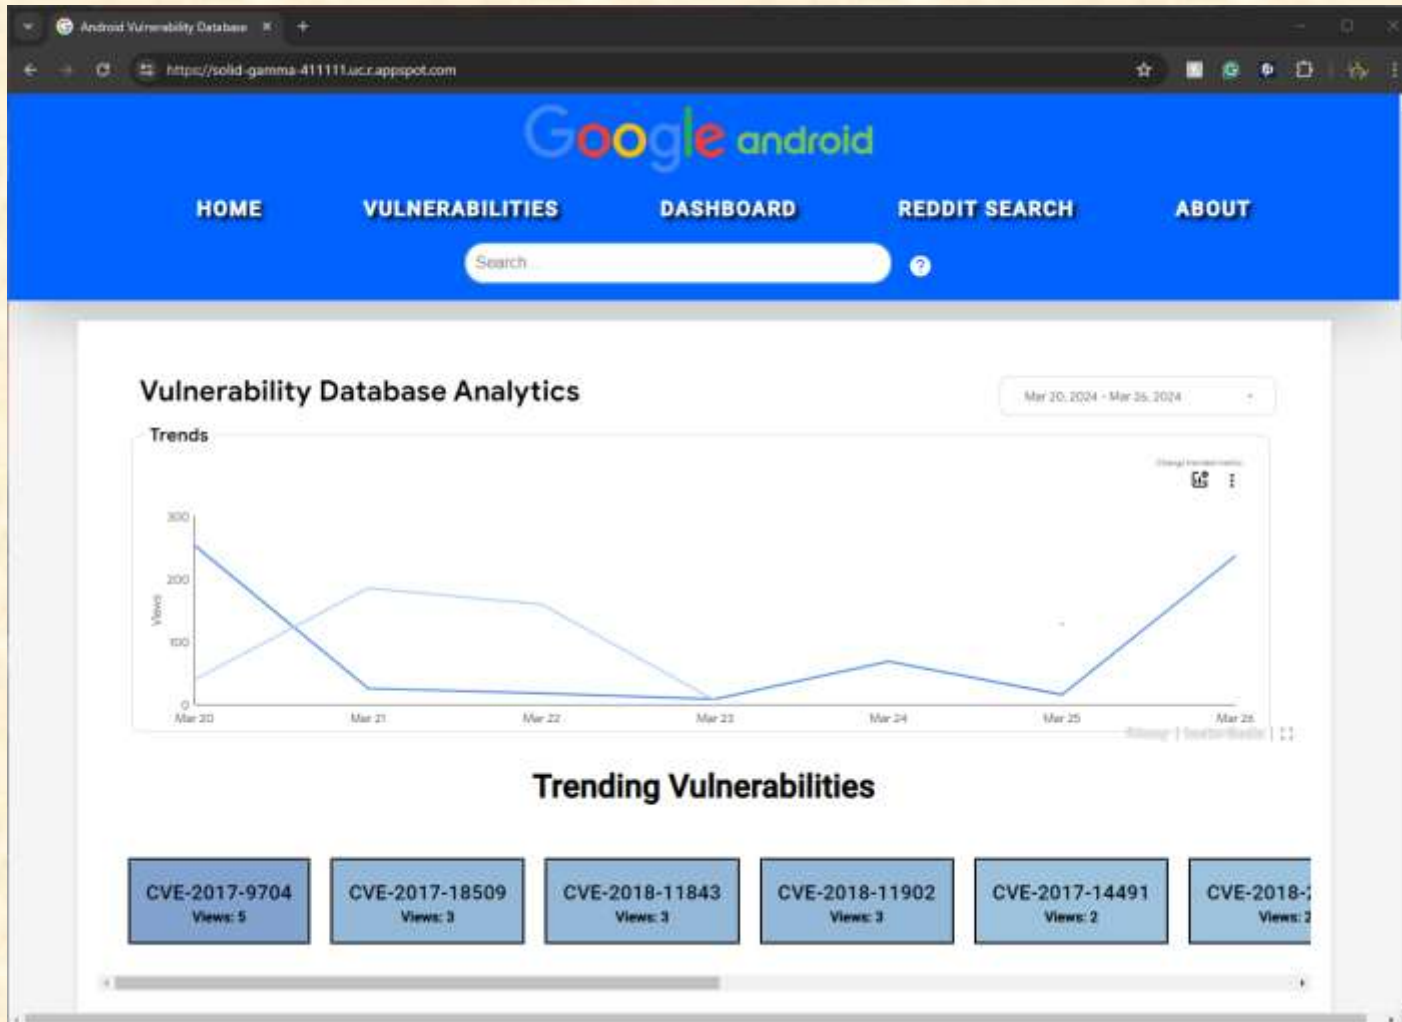

- Compile Android Security Bulletin and National Vulnerability Database vulnerabilities into one place
- Enable OEMs to identify high priority security vulnerabilities
- Easy to use web-application utilizing our API to allow users to query vulnerabilities

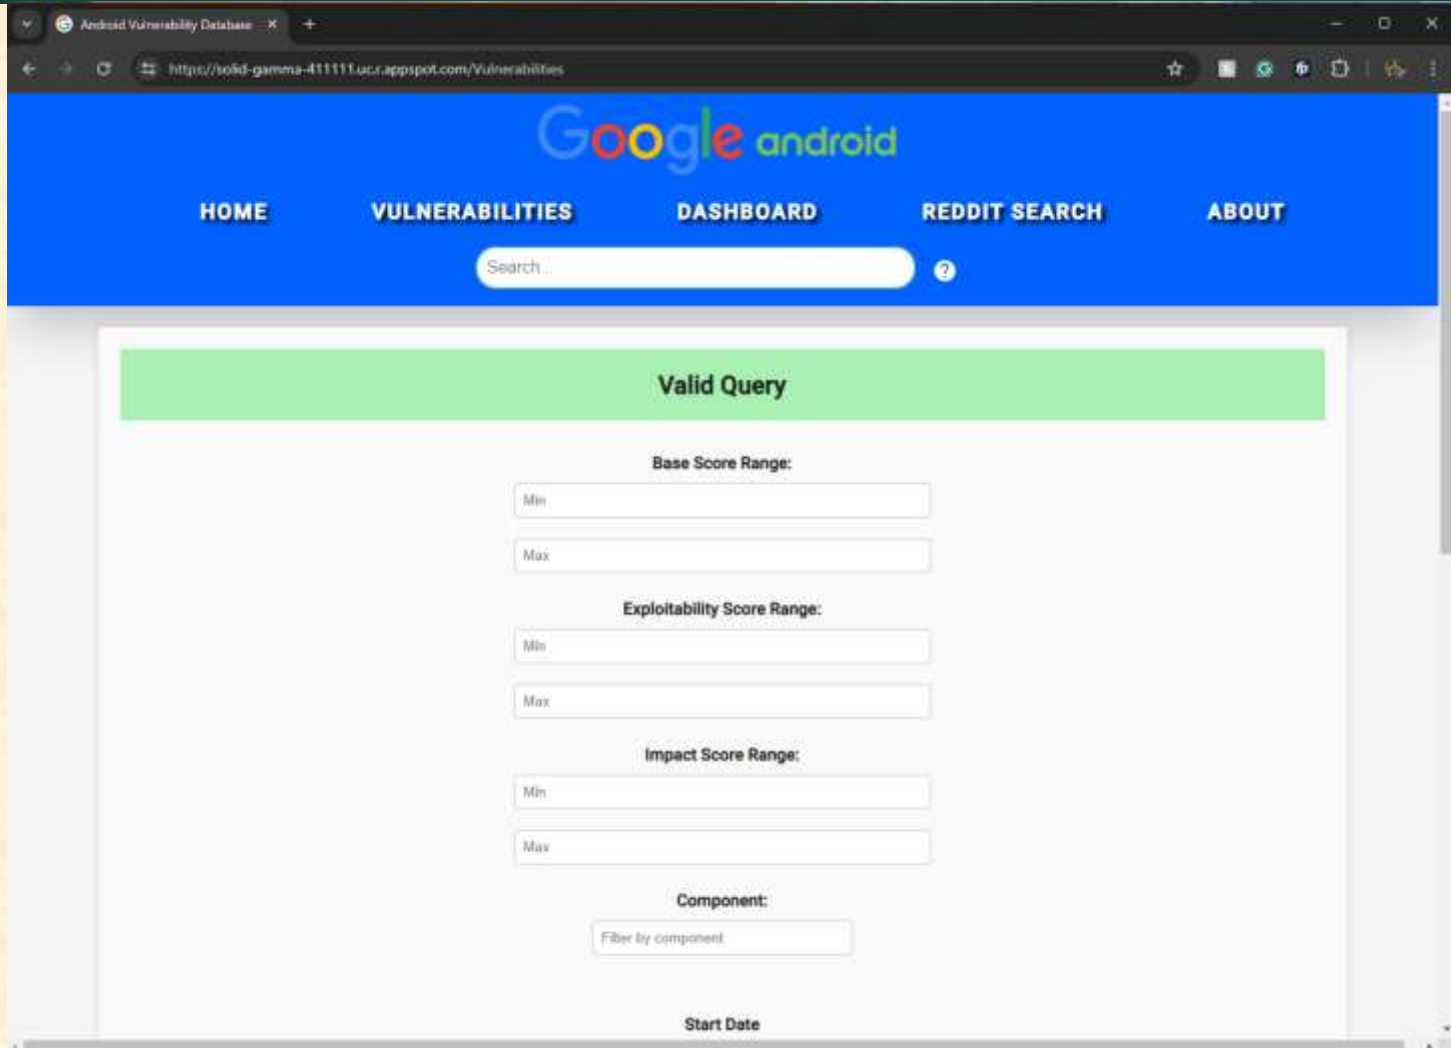

System Architecture

Home Page

Query Page

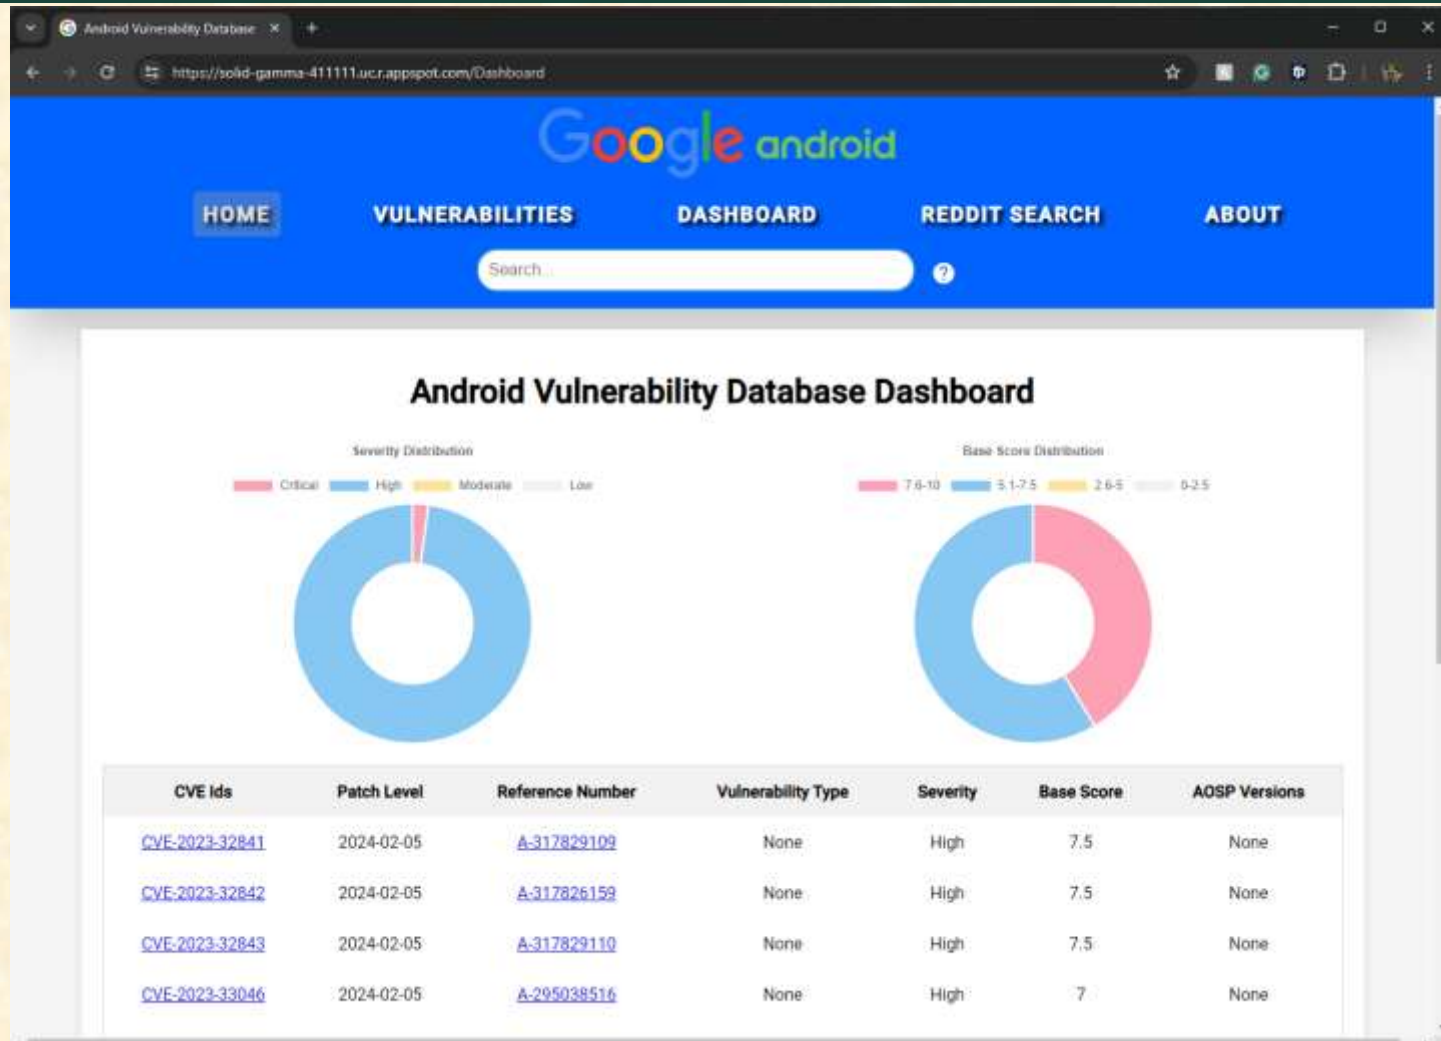

The screenshot shows a web browser window displaying the "Android Vulnerability Database" query page. The browser's address bar shows the URL: `https://solid-gamma-411111.ucr.appspot.com/Vulnerabilities`. The page features a blue header with the "Google android" logo and navigation links for "HOME", "VULNERABILITIES", "DASHBOARD", "REDDIT SEARCH", and "ABOUT". Below the header is a search bar with the placeholder text "Search...". The main content area is titled "Valid Query" and contains several input fields for filtering results:

- Base Score Range:** Two input fields labeled "Min" and "Max".
- Exploitability Score Range:** Two input fields labeled "Min" and "Max".
- Impact Score Range:** Two input fields labeled "Min" and "Max".
- Component:** A dropdown menu with the text "Filter by component".
- Start Date:** A label for a date input field.

7.8 Base Score

1.8 Exploitability Score

5.9 Impact Score

Additional Information

Patch Level: 2023-12-05

CVE: CVE-2022-40507

References: A-261468680

Severity: Critical

Component: Qualcomm closed-source components

Subcomponent: Closed-source component

ASB URL: <https://source.android.com/docs/security/bulletin/2023-12-01>

Date: 2023-12-01

Metric Version: 3.1

Patch Level: 2023-12-05

Publicly Available: True

What's left to do?

- Stretch Goals
 - Pixel Security Bulletin
 - Reddit/Press pickup
 - Change Log
- Other Tasks
 - UI/UX improvements
 - Small Bug fixing
 - Activate Scheduling
